

The International Group for Hydraulic Efficiency Measurement (IGHEM) is Preparing for Its Next Conference

The International Group for Hydraulic Efficiency Measurement (IGHEM) is having its biennial conference at the University of British Columbia, Vancouver, British Columbia Canada. Please mark your calendars for August 12 through 14 2024. The conference will be organized by Jan Buermans of [ASL AQFlow Inc.](https://aqflow.com), with the support of the IGHEM committee. The conference will focus on the experimental, theoretical and computational approaches enhancing measurements in hydro power plants with topics that include for example, Application of AI in the field of turbine monitoring, Case studies of efficiency measurements, Importance of the efficiency evaluation of hydro power plants and hydro systems, and many more. To find out more details about the conference topics please visit our website here: <https://ighem2024.ca/>.

Important dates:

Abstract deadline is January 31st, 2024

Jan Buermans,
President, AQFlow Inc. and
IGHEM 2024 conference chair
